

IN THE CLAIMS

Please cancel claims 1-6, 11 and 12 without disclaimer or prejudice as to the subject matter of claims 1-6, 11 and 12.

Please add new claims 13-15.

13. (New) A deflection coil for a cathode ray tube, said deflection coil comprising:

a plurality of flanges fanning out in a fan-shaped manner from a rear flange to a front flange; and

a current supply wire having a first portion detached from said front flange and a second portion attached to said front flange, wherein an impression of said first portion of said current supply wire is absent from said front flange.

14. (New) The deflection coil of claim 13, wherein the first portion of said current supply wire is S-shaped by design during a winding of said deflection coil.

15. (New) A deflection coil for a cathode ray tube, said deflection coil comprising:

a plurality of flanges fanning out in a fan-shaped manner from a rear flange to a front flange; and

a current supply wire having a beginning portion detached from said plurality of flanges, wherein said beginning portion of said current supply wire is S-shaped by design during a winding of said deflection coil.
